

Research Study (#08125) Adults with Hepatitis C

CRL#: 08125

Population needed: Males and Females of non-childbearing potential with Hepatitis C

Description: In this study we are testing an investigational drug being developed to treat Hepatitis C. We will be assessing, among other factors, the safety, side effects, how the body breaks down the drug, and the effect of the drug on the virus in the blood.

Requirements:

- 18-64 years old
- Diagnosed with Hepatitis C
- No previous Hepatitis C treatment
- Females must be postmenopausal or surgically sterile (hysterectomy or both ovaries removed)
- Available for a 5-night stay and 6 outpatient visits at our facility in Tacoma, WA

Stipend: up to \$1,545 for time and travel expenses

Please note:

- All personal health information submitted by online registration will be added to our database with your approval. All information remains confidential within our database at Charles River Clinical Services, Northwest and is not shared with outside parties.
- If you agree to be contacted for this or future trials, your contact information will be used to reach you by phone or email.

For more information, please call the Recruiters at Charles River Clinical Services Northwest at 1-877-NWSTUDY or 253-779-8815, or email to RecruitersNW@crl.com.
